## WEAN MORE THAT WEIGH MORE WITH SHORTHORNS

*In these days of rising costs, cattlemen are looking to Shorthorns for crossing, because . . . they know a Shorthorn bull will add 50-60 pounds to the weaning weight of each calf. They know the resulting calf will be husky, fast-growing and freer from disease.*

*They know the replacement heifers will calve easier and give more milk.*

*They know the end result is more money in the bank. Join the swing to Shorthorns.*

*They know there will be a higher percentage calf crop with a Shorthorn bull in the pasture or on the range.*
